

Osborne School Outreach Service

Training

We are able to offer bespoke training tailored to the needs of your school. This could be in the form of an INSET, twilight, staff meeting, training for specific groups of staff or in house training offered at Osborne School. We are also able to offer Autism Education Trust (AET) accredited training. Our non-accredited training is generally free for Hampshire LA schools. Please contact the Outreach Team for further information about training and training costs if you are an academy or are interested in one of our accredited training courses.
