

The story without Wi-Fi
By Ollie Couzens

This is the story of when we had no internet.

It has gone said Ben sadly Ollie said, unfortunately I can't do anything. We wanted to make things better. We had no internet since the 5th of January but everyone was sad. And we was not using the internet for 2 or 3 months. And now we have Wi-Fi on the 23rd of March as we think that the internet was down for 2 or 3 months.

We had a little bit of fun. Everyone was working really hard without WIFI. We also played Hangman, Pictionary, and all the games we love. But unfortunately, we were trying to get the WIFI back. **And still did not work.**

And some of the computers started to work and then stopped working! Some laptops being slow.

We were not using the laptops for the same time we had no WIFI. We did our lessons carefully without using the WIFI but then we had it working well, "what shall we do?" said John putting a smile on his face. Wait, said Ben. Ollie started crying. Really? He said. This is not good. Why can't you just flick the switch? Because we need a person who can sort it out. After all that, we had some work done with outside our building. We couldn't get work done because the drill was loud. Well, that's the end of our story. We managed to get our Wi-Fi back and it all went back to normal.

Until we have managed to stop a message that said website is declined. I think they have sorted it out!

THE END
